

ITEM No. 6

January 23, 2009

**ERRATA SHEET**

**CHANGES TO ORDER NO. R8-2009-0003, NPDES No. CA998001**  
General Waste Discharge Requirements for Discharges to Surface Waters  
That Pose an Insignificant (De Minimus) Threat to Water Quality  
(National Pollutant Discharge Elimination System Permit)

(Language deleted is ~~strike through~~)

(Language added is **bold and shaded**)

1. Order, page 21 of 22, modify paragraph VII.C.6.f. as follows:
  - f. As appropriate, the regulation of the following types of discharges **by MS4 permittees** ~~listed below~~ shall be transferred to the MS4 general permits issued to the cities, municipalities and Counties within the Santa Ana Region, when the updated MS4 general permits **with applicable terms and conditions necessary to address the regulation of these discharges** are adopted **and effective.** ~~with applicable terms and conditions necessary to address the regulation of these discharges.~~
2. Order, page 21 of 22, modify paragraph VII.C.6.f.(9) and add new sub-paragraph VII.C.6.f.(10) as follows:
  - (9) Discharges resulting from diverted stream flows; **and**
  - (10) Construction dewatering wastes.**
3. Attachment F, page F-6 of F-22, modify first paragraph of section III.B.1., as follows:
  1. Discharges of the types listed in III.A.1., III.A.4. through III.A.9., and III.A.11. through III.A.13. to municipal separate storm sewer systems (MS4) from MS4 permittee activities within the Region will be regulated under this Order until the MS4 permits adopted by the Regional Water Board for the municipalities, cities and counties within the Region are re-issued with applicable terms and conditions necessary to address the regulation of these discharges. Reissuance of the permits is expected in early-mid 2009. Upon the adoption of MS4 permits that contain appropriate permit provisions, discharges of these types to the MS4 **by the MS4 permittees** will be regulated under the MS4 permits. Similarly, other waste discharge requirements issued by the Regional Water Board may be amended, as appropriate, in the future to address this de minimus discharges and thereby eliminate the need for coverage under this Order.

4. Attachment F, page F-6 of F-22, modify second paragraph of section III.B.1., as follows:

**Rationale:** These de minimus discharges, which in many cases consist of potable water, are or can be regulated under the area-wide MS4 permits or other waste discharge requirements ~~and are or can be regulated under those permits and are or can be regulated under those permits.~~ This approach streamlines the regulatory process for these dischargers. Where these discharges are to waters of the U.S. and not to the MS4, the discharges may continue to be regulated under this Order.
